G7016* Anthracite grey

G9002* Grey white

G9005* Jet black

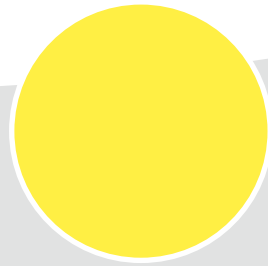

G6005* Moss green

ArcelorMittal's **Granite®** and **Estetic® Standard** range of organic coated steels are available in a rich diversity of colours and surface finishes. This is one of the outstanding advantages of organic coated steel. To help you make your choice, ArcelorMittal offers a wide range of colours to suit your taste and your budget. Other colours are available on request. Diversity and originality will be your trademark.

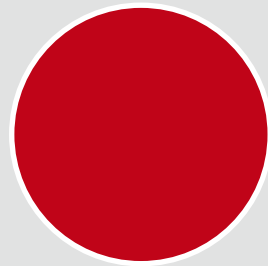

This range of colours has been specially designed for the following products: Granite® Standard, Granite® HD, Granite® HDS, Granite® HDX and Estetic® Standard. To check which colours are available for specific products or applications, please consult the selection guide on the next page.

All these colours have a smooth finish and 30 GU (gloss units - Gardner 60°).

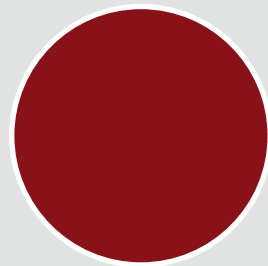

The colours presented in this colour palette can be supplied from all our organic coating lines. We have put in place a common quality assurance system in all mills to enable us to guarantee that colours produced on all our lines conform to the standard.

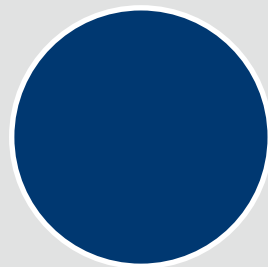

G1018* Zinc yellow

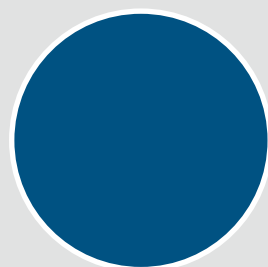

G3000* Flame red

G3011* Brown red

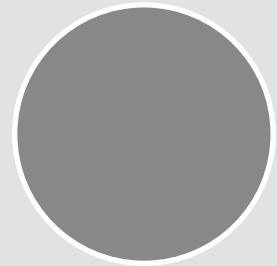

G5002* Ultramarine blue

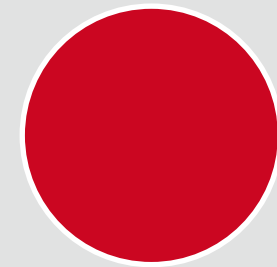

G5010* Gentian blue

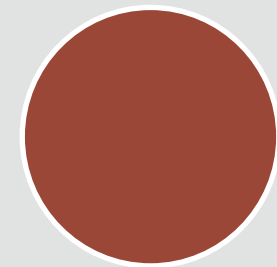

G9006* White aluminium

G9007* Grey aluminium

G8701 Rojo Teja

G8004* Copper brown

NB: Although we have taken great care to reproduce the colours in this palette, we cannot guarantee that they are a perfect representation. Consequently, these printed colour samples can only serve as a guide.

** RAL code that is the closest approximation*

The table opposite shows which colours are available for which application. For outdoor use, we recommend the "Magic" range. These coatings are made with resins and pigments with excellent resistance to UV rays, so that we can guarantee that the colours will not fade (see terms of ArcelorMittal guarantees).

When ordering metallic colours, clients should always place an order for the whole building at the same time, or at least for a whole facade. It is also essential to ensure that the material is mounted the right way up.

For quality and uniformity, we offer two standard colours for the reverse side of the strip: B 7032* and B 9002*.

For further information on the technical properties of the different products and durability guarantees, please consult our website: www.arcelormittal.com/fce > Products & Services.
